ABOUT ME

I am particularly interested in applying artificial intelligence to real-world challenges, including public safety, healthcare, resource optimization, and language processing. My goal is to explore and develop AI-based solutions that improve efficiency, decision-making, and accessibility in these areas.

PROFESSIONAL EXPERIENCE

11/2025 – 01/2026 — Cotonou, Benin
Web & AI Developer - Internship
SharayTalent
Developed a Django backend for an AI-driven talent management platform, integrating automated CV extraction, psychometric analysis, and quiz generation. Contributed to scalable system design through API development, database management, and architecture optimization to streamline recruitment processes.

06/2025 – 09/2025 — Bénin
AI Engineering Intern
AdjibolaTech
Worked on AI-based telemedicine solutions, such as real-time transcription and contextual medical assistance. Developed an ASR model adapted to African French accents and specialized in the medical field, in order to improve the accuracy of speech recognition systems in the healthcare sector.

07/2024 – 09/2024 — Abomey-Calavi, Bénin
Backend Development Intern
Cabinet Jilmonde Consulting
Worked on a project to create a web portal for a company that sells and produces newspaper articles.

EDUCATION

10/2022 – 04/2026 — Abomey-Calavi, Bénin
Bachelor of Science in Computer Science (Option: Artificial Intelligence)
University of Abomey-Calavi: IFRI
Main modules:
- **AI and data science:** Machine Learning, NLP, Computer Vision, Data Analysis, Optimization
- **Mathematics:** Calculus, Linear Algebra, Statistics, Probability, Algebraic Structures
- **Programming:** Object-Oriented Programming, Data Structures, Application Development

GPA: Year 1 (L1): **16.02/20** | Year 2 (L2): **15.62/20**

2022 — Ouidah, Bénin
Baccalaureate – Science Track (Série C)
CEG Pahou
- Highest Honours (**16.27/20**)

HARD SKILLS

- Python
- Django
- Tensorflow/Pytorch
- SQL
- Power BI
- Data Analysis
- OpenCV / Scikit-Image
- Numpy - Pandas
- Backend Development

SOFT SKILLS

- Analytical Thinker
- Curious and Creative
- Collaborative and Team-oriented

SOME PROJECTS

AI4CKD Hack
We developed a machine learning model to predict chronic kidney disease stages using clinical and demographic data collected prior to laboratory test results. The dataset used for the project was provided by **CNHU-HKM** (Benin) in collaboration with the **AI4CKD initiative**. Applied advanced preprocessing, statistical analysis, and classification techniques (**Random Forest, SVM, KNN**) to support early diagnosis and improve patient care. **Demo** **Report**

Whisper Small Fine-tuning for African French Accent Recognition

- Adapted the Whisper Small model for African French accents using radiology reports. Achieved a **Word Error Rate (WER) reduction from 109.6% to 20%**, representing a **75% improvement** in transcription accuracy, on our test sample.
- Creation of the **first open-source dataset** of African French intended for speech recognition technologies in the medical field.
- Bachelor Thesis Project

Automated Exam Scheduling System

Development of an automated exam scheduling system using **constraint programming** to optimize university exam schedules. The solution efficiently assigns exams to available rooms while respecting key constraints such as room capacity, student schedules, and time between exams. ***GitHub***

Hackathon Zindi – ARC Challenge Africa

AI research competition focused on the Abstraction and Reasoning Corpus (ARC). Investigated **transductive inference** methods by leveraging large language models (LLMs) to generate and execute exact code solutions for individual problem instances. I got a score of **0.30** accuracy on the private test set. **Notebook**

ANIP Challenge: Face Recognition - Age Estimation - OCR

Worked on the ANIP 2025 Computer Vision Challenge by building models for face detection, age estimation, and OCR, including data preprocessing, model experimentation, and performance evaluation. **Github**

ORGANIZATION

AMLD Africa

AMLD Africa 2025-2026 Ambassador

Organize AMLD events in Benin to promote inclusive AI education as part of a pan-African initiative to democratize AI.

CERTIFICATES

12/2024 – 04/2025	**Natural Language Processing & Large Language Models** Force-N Senegal
07/2025	**NeuroAI - Summer School 2025** Neuromatch Academy
08/2025	**ACP Summer School 2025** Association of Constraints Programming
08/2025	**Virtual Deep Learning Indaba 2025** Deep Learning Indaba

AWARDS

05/2025	**Winner – LLMs for OHADA Law Innovation Competition by Force-N Senegal** Zindi Africa *The challenge was organized after a training program in AI & NLP. During the hackathon, we developed a legal question-answering system using retrieval-augmented generation.*

MOOCS

- OpenCV's TensorFlow Keras Bootcamp
- Coursera Advanced Learning Algorithms (Standford)
- IBM Data Science Professional Certificate
